

Lightroom

Crop Tool

- Located on Right Panel – Develop Mode
- Press **R** to get Crop Tool in any of the Modes
 - If you are in Library Mode and press **R**, it will automatically take you to the Develop Mode
- Select one of the handles on the photo and crop
- Can Crop manually or use a specific area such as 8x10
- Use this tool to **Straighten a Photo**
 - Grab the Angle Tool
 - Then draw a straight line across the photo to straighten it
- Once you get the photo where you want it, you can click on the Lock on icon (box) to lock it in
- To switch from Horizontal to Vertical press **X**

Straighten (Auto)

- Go to Develop Mode
 - If in Library Mode, press R
- Select the Crop Tool
- Press AUTO
-
