

Lightroom

Maps

- Map Module – Top bar (Right Side)
- If you have no GPS system on your camera
 - Click on the Map and it will open Google Maps
 - Type in the Location
 - Find the area Photo(s) were taken
 - Drag the photo(s) to that area on the map
- Can select a group of photos and Geotag them
- Save location – sort of like a Smart Collection
 - Set the Radius
- Can use a Track Log from iPhone
- If your Camera has a GPS function on it
 - Location will automatically appear on the map
