Missing Folder (files)

- If you get a question mark (?) next to a folder name (left panel), it means that LR was managing the folder, but it can not find it now
 - This could be because:
 - Folder was moved outside of LR
 - Folder was re-named outside of LR
 - It was deleted
- To Find the Folder
 - Right click on the Folder
 - Select Find Missing Folder
 - Then navigate to where the folder is supposed to be located
 - Find the Folder and highlight it
 - Select CHOOSE at bottom of dialog box

Re-Name a Folder

- Do it in LR
- Go to Folder
- Right Click
- Select Re-Name
- Give the Folder a new name
