

# Upload Photos from iPhone to a iMac / iPad and/or PC

## Upload photos from an iPhone to a iMac

1. If your devices are on the same wireless network
  - a. Go to your iPhone and open the **Photos App**
  - b. Go to the **Album** with the photo(s) wanted
  - c. Press the **Select** button (top right)
  - d. Drag your finger across the photo(s) wanted or click on each photo wanted
  - e. At the bottom left of screen – press the box with an arrow pointing up
  - f. Then select **AirDrop** (bottom left)
  - g. Finally, press the device wanted – iMac
  - h. The photo or photos will show up in the Downloads folder dialog box on the Mac
    - i. On the Mac
      1. Open the Photo App
      2. Drag the newly uploaded photo to the folder (wanted) in the Photo App
2. If you connect your iPhone to your iMac with a cable
  - a. Follow the same procedure as above

## Upload photos from an iPhone to a PC

1. Connect iPhone to PC
2. Open Windows Explorer
3. Double click on **“This PC”**
4. Double click on **“Apple Phone”**
  - Then go to your iPhone and tap **“Allow”**
  - This will allow your PC to access your iPhone
5. Then double click on **“Internal Storage”** -> DCIM-> folders
6. Select the folder to access the photos wanted
  - These folders are by date
  - Ex. 202206-> Day = 20 / Year = 22 / Month = 06
  - Select the photo(s) wanted, right click and select **“COPY”** and then Paste them on a folder on the PC

### **Connect an iPhone to an iPad to upload photos**

1. On your iPhone
2. Go to your Photo App and open it
3. Do the same on your iPad
4. Go to the Album where the photos you want to transfer are located
  - On your iPhone – select the photo or photos wanted
5. Then press the box with an arrow in it (bottom left)
  - Press the AirDrop button (middle left)
6. Finally select the device (iPad) you want to upload the photo or photos to

### **Connect the iPad to an iPhone to upload photos**

1. From your photo library on your iPad
2. Follow the same procedure as above but in reverse
