Lightroom

Applying Changes Made to One Photo to Other Photos

- Lets say that you have multi photos that need basically need the same changes
    - o Example – Underwater shots

- Make all the changes needed in the one photo
    - o Press the COPY button at bottom left of on the Panel
        - ▪ A Copy dialog box will appear
        - ▪ Select all the areas you want to copy
    - o Then select all the photos that need the same changes
    - o Press the PASTE button at the bottom left of on the Panel

- This maybe especially true when it comes to White Balance
