

Lightroom

Creating Shallow DOF

- Have a photo you want to add a shallow DOF to make the Subject Stand out
- In the Develop Mode
 - Go to Adjustment Brush
 - Select **Sharpness** and drag it all the way to the left (no sharpness)
 - Turn off **Auto Mask** (check box)
 - Use the brush tool to create a blurred area
 - Once the large Range area is done
 - Turn on **Auto Mask**
 - Then do the detail work
 - Keep the “+” sign away from the area you do not want to blur
